## Advanced Combat Bipod

The Advanced Combat Bipod is a low profile bipod which features adjustable legs from 9" to 11 1/2". The legs have a silent release mechanism and fits MIL STD 1913 / picatinny rails.

- Low profile design
- Built in Travers Mechanism
- Silent Leg Release Mechanism
- Adjustable Legs
- Weight 15oz
- Maximum width of the legs 12.48"
- Extended height 10.5", collapsed height 8"

## ARC-L (C)

The ARC-L (C), a patent pending two-piece modular magazine offers a proper magazine form, maximum strength and integrity. ARC magazines, with the strength of construction handles the impact that crushes metal magazines. No disassembly of the ARC is required as it has a low-friction semi-floating follower that is slotted to allow for easy cleaning. Just dunk the ARC Mag in hot soapy water, rinse, invert to drain.

- Aggressive ridges front and rear allow a positive purchase when seating the ARC Mag.
- Deep Waffle pattern on magazines assist in rapid extraction from mag pouches.
- Life expectancy for the spring is 100,000 + cycles.

## BattleGrip

The Battle Grip is a quick detach/attach vertical grip that fits just about every type of rail. It features a patent pending throw lever system that is steps above anything else available to operators. The throw lever locks in place when installed and cannot be inadvertently unlocked, if caught in web gear, slings, etc. A simple push button releases the throw lever from the locked position allowing lightning fast attachment or removal when you decide. It fits any type of rail from the MIL-STD 1913 to commercial Weaver rail without tools. Some models are equipped with pockets for Insight or Surefire pressure pad switches. Also available in short grip version.

- Quick, easy, simple attachment and detachment.
- Best heat and impact modified polymers.
- Available in black, flat dark earth, and foliage.

## Foregrip

The Battlegrip Foregrip comes in 3 different models. The foregrip has a dual locking bar mounting system. It also incorporates pressure pad switches in two of the models, one for Insight and the other for Surefire. The third model is a stubby version. They also include a waterproof internal storage compartment. The foregrips are also heat and impact fortified for shatter resistant and fracturing from impact.

- BGV-ITI version is standard issue in the SOPMODII Kit.
- Each grip has a dual locking bar system.
- Each grip has a waterproof internal storage compartment.
- Available in Black, Flat Dark Earth and Foliage.

## Rail Grips

TangoDown Rail Grips offer superior impact and easy installation on Mil-STD 1913 weapon system rail fore ends. They may be placed anywhere on the rail (depending on the rail length). The aggressive texture allows a positive grip on the weapon even in wet or muddy conditions. There are nine different sizes and options. Some have built in slots for pressure pads for Insight and Surefire equipment.

- Binary Aggressive Texture
- Superior Heat and Impact Resistant
- Available in different sizes and options
- Available in black, flat dark earth, and the foliage
